# History & Growth

Since its establishment in 1981, Alscan has consistently been at the forefront of delivering cutting-edge security solutions. We specialize in the design, installation, and maintenance of advanced security systems catering to diverse sectors such as commercial, industrial, correctional, medical, and educational institutions.

Whether you're a corporate executive, security director, facility manager, or a small business owner, we recognize that security is a collective responsibility. Alscan is dedicated to offering state-of-the-art technology, effectively meeting the stringent requirements of even the most challenging applications.

Our team of Alscan specialists collaborates with clients to custom design, install, and maintain advanced security systems tailored to their specific needs. At Alscan, our mission is to deliver engineered systems that not only meet but exceed the expectations of our valued customers.

# ALSCAN

*Our Business is Minding Yours™*

For the latest in custom designed security solutions, depend on us.

# Our Approach

**CUSTOM SOLUTIONS**

**DESIGN & INSTALLATION FOR YOUR SECURITY NEEDS**

**INTEGRATION OF SECURITY SYSTEMS**

**CERTIFIED TECHNICIANS**

**CURRENT LICENSES**

Alscan is dedicated to the custom design, installation, and maintenance of advanced security systems tailored to meet the specific needs of any business. We consider the comprehensive scope of your company's security requirements to determine the most effective system for your unique situation.

Our commitment to providing businesses with peace of mind is realized through the seamless integration of video security, access control, perimeter protection, and audio communication systems. Alscan has been a leading systems integrator since 1981.

To ensure our technicians are well-equipped with the latest industry knowledge, Alscan's certified technicians undergo continuous education in the most recent innovations. Additionally, we maintain current licenses in all areas we serve, reinforcing our dedication to delivering reliable and state-of-the-art security solutions.

# Your Security Solution

Prior to the actual design of your system, we engage in direct consultations with your company's personnel and conduct thorough evaluations and planning. This collaborative approach allows us to comprehensively assess the full spectrum of your company's security needs, enabling us to determine the specific requirements for your unique situation.

Our extensive network includes connections with various national manufacturers and product lines.

In order to stay current with the latest technological advancements, we actively monitor and evaluate the newest innovations. If these innovations meet our rigorous standards, we seamlessly integrate them into our state-of-the-art custom security solutions. This commitment ensures that our clients benefit from the most up-to-date and effective security technologies available.

## Your requirements determine our recommendations.

ENTRY LEVEL TO  
ENTERPRISE LEVEL SYSTEMS

PROXIMITY &  
SMARTCARD READERS

KEYPADS

BIOMETRIC READERS

PATIENT WANDERING  
SYSTEMS

INFANT ABDUCTION  
SYSTEMS

REMOTE SYSTEMS  
LOCKDOWN

TURNSTILES

# Access Control

Access control systems provide a robust, scalable, and dependable method for securing a facility. These systems play a crucial role in preventing unauthorized entry into secure areas by regulating access based on predefined criteria such as specific individuals and designated timeframes.

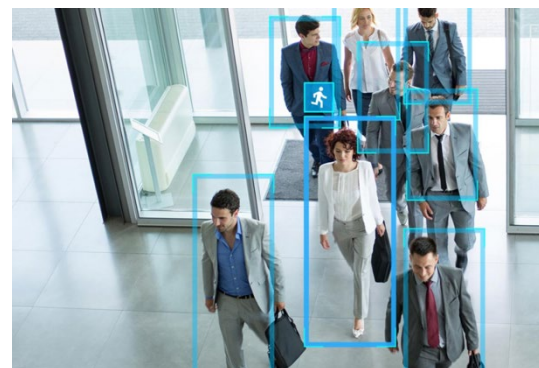

# Video Surveillance

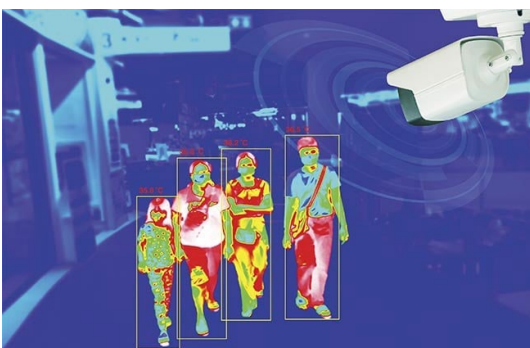

IP VIDEO SYSTEMS

CLOUD VIDEO SYSTEMS

VIDEO ANALYTICS

THERMAL VIDEO SYSTEMS

LICENSE PLATE RECOGNITION

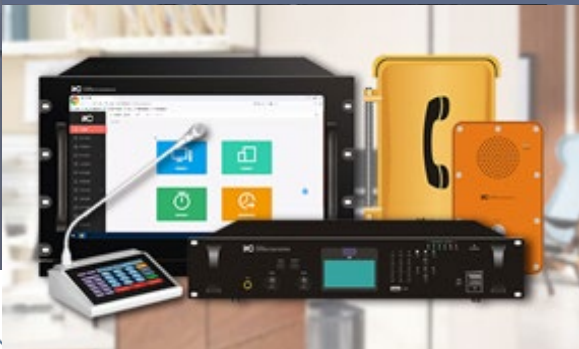

Video surveillance aids in monitoring suspicious activities, overseeing safety measures, safeguarding and preserving property, and furnishing records for later review.

COMMERCIAL SOUND

AUDIO / VIDEO INTERCOM SYSTEMS

INSTITUTIONAL INTERCOM  
& PAGING SYSTEM

NURSE CALL COMMUNICATION SYSTEMS

AREA RESCUE STATIONS

# Sound and Communications

Sophisticated communication systems establish essential communication pathways within a facility. Video intercoms offer businesses the capability to identify visitors prior to granting access or authorization to restricted areas. Each of these system solutions is meticulously custom-designed to address your unique security needs and concerns.

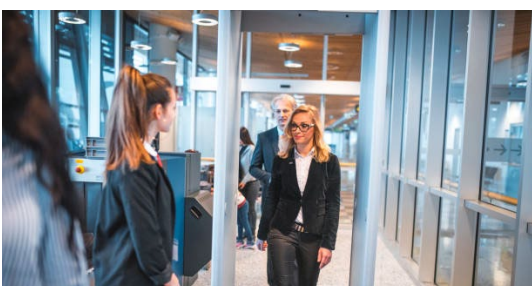

# Perimeter Protection

**PARKING GATES**

**FIBER FENCING**

**METAL DETECTORS**

**INTRUSION DETECTION SYSTEMS**

Perimeter Protection Systems allow facilities to detect, deter, delay, assess and respond to intrusions. These systems can be monitored remotely and integrated with other security components for added convenience and functionality.
